STATEMENT OF EVIDENCE:

County Surveyor's book in the office of the Benton County Highway Dept indicate a iron monument was placed at this corner.

A search of the area failed to uncover the marker. Occupation lines consist of centerline of a north-south road, there being no distinct lines of occupation east or west.

Due to the severe deflection angle the road centerline includes a horizontal curve, the tangents of which intersect at a point (P.I.) which was examined as the section corner. A Mr. Golden, land owner to the northwest and southwest of this corner, pointed out a line along the south edge of a planting of trees which he believed to be the north line of Section 15. Upon taking measurements along the north-south section line the tree line was found to agree with G.L.O. distances whereas the road P.I. lies considerably farther north.

The corner was therefor restored at a point on the northerly extension of the south centerline tangent by proportionate distances between the southwest corner of Section 15 and the east quarter corner of Section 10.

William F. Lunser, L.S.
