2001 Westwood Professional Services, Inc. found a steel post (fence corner) set in concrete. We looked for other evidence of monuments and found nothing. We measured 5153.41 feet between section corners and found the steel post to be 6.5 feet south and 6.6 feet east of the lost position. We accepted the post as marking the obliterated location of the corner. We established reference ties using the top of the fence post.
