2001 Westwood Professional Services, Inc. established a theoretical position for this corner on a straight line between the North 1/4 corner of Section 30 and the NE corner of Section 28. Position falls 6 feet north of an east-west fence line.

Measurements from computed position:

2685.79 feet to E 1/4 corner Sec. 30
 10,683.86 feet to NE corner Sec. 28
 2646.16 feet to N 1/4 corner Sec. 30

County Coordinates computed from traverse information:

NAD 83 (1996 Adjustment)
 N- 142815.10
 E- 484119.61

NOTE: DO NOT USE - Corner area needs to be searched!

2002 No record evidence of this corner has been found in the Benton County records.

2006 The Benton County Surveyor's Office searched the area for additional corner evidence, but none was found. The theoretical position determined in 2001 was ignored since it does not follow any accepted method for the remonumentation of obliterated or lost corners. The east-west fence line was held for the north-south position and the east-west position was determined by proportionate measurement from the north quarter of Section 30 and the northeast corner of Section 28. A 1/2" iron pipe capped 19552 was set on the south side of the east-west fence at proportionate measurement east-west and reference ties were established
