DOCUMENT NO. _____

STATEMENT OF EVIDENCE:

No records were found to indicate use or remonumentation of this corner after its original placement by the U.S. Government Survey.

A search of the area revealed a masonry nail at the intersection of fence lines east and west with the centerline of a north-south township road. By lost methods, the point midway between opposing section corners would place this quarter corner 16 feet south of the nail and in close proximity to the center line of a farm entrance serving land to the southwest. The driveway parallels the westerly fence for several hundred feet before turning to the southwest.

Since the western fence continues westerly in a straight line and corresponds with the fence to the east, the driveway is presumed to have been built entirely on the land it serves while the fence lines stand as accessories to an obliterated government corner.

The nail was therefore removed and replaced with a one half inch iron pipe.
